

Genesis 1:14-25

SUN, MOON AND STARS:

- Coordinating previous creation
 - collecting and condensing 'light'
 - filling the 'expanse' of sky
- Rhythms of time
 - an environment we thrive in
 - perhaps time itself was created here
- Showing us universe to explore
 - setting the stage for science

Significance: **Creation is leading up to human life.**

FISH, BIRDS AND ANIMALS:

- New kind of life (has a brain)
- Filling spheres of creation (seas, skies, land)
- First blessing (like blessing to man, but limited)

Significance: **Life is supernatural**

Science Note:

Science has failed to validate the theory of evolution. Perhaps the most obvious proof of that is the fossil record, which fails to give any evidence of gradual evolution from one species to another. Rather, the fossil record shows species appearing instantly, fully formed.

Yet evolutionists still believe in evolution, without scientific verification. Stephen J. Gould, our generation's foremost evolutionary apologist, says:

Days 4, 5 and 6 of Creation. (cont.)

"We fancy ourselves as the only true students of life's history, yet to preserve our favored account of evolution by natural selection we view our data as so bad that we never see the very process we profess to study." Evolution's Erratic Pace," Natural History, vol. 86 (May 1987), p. 14.

Believing something to be true without 'proof', or believing something alongside a certain level of unknowing, is the definition of Faith.

Therefore, evolution has ceased to be science, and it has become a religion.

You and I must choose our faith. I choose to believe God.

Looking Ahead: All of creation will be recreated.

-1 Corinthians 15:38-42
